GENTLEMEN:—I know from practical experience that iron well galeunized with zinc will not oxidize or rest one particle. I can safely say, after several years experience in the manufacture of chains for chain-pumps and water-drawers, in which I have tested the affinity of iron and zinc, that if the process be conducted properly, it is a perfect weld of the two.

Nearly one year: go my family commenced using one of your Wringers. It now performs all its functions as well as it did the first time it was used, and has become an inpensable article with us. I have closely observed several other kinds of clothes-wringers, the modus operanditioning different, trying to produce the same results as the Putnam Wringer, but in my judgment they have failed.

The Putnam Wringer is as near perfect as possible, and I can cheerfully recommend it to be the best in use.
